
V. STORMWATER AND FLOODPLAIN MANAGEMENT

Describe proposed drainage control methods to comply with ordinances. If proposing to connect with existing sewer or drainage system, identify point of connection and adequacy of system to handle additional flow. Show all drainage provisions on site plans.

If located within a flood-prone area, describe methods and materials that will be used to minimize flood damage in accordance with Borough ordinances. Attach plans and elevations to demonstrate compliance; delineate area subject to flooding and any existing stream improvements or protective works.
